SESSION 4 PANEL DISCUSSION

MODERATOR

TOPIC

ENVIRONMENTAL ASPECTS OF HYDROCARBON DEVELOPMENT

This session will address data and methods for accounting for methane and associated gas emission from hydrocarbon production value chain elements, and innovations in emission measurements as well as reporting requirements as the worldwide natural gas industry works toward reducing its contribution to greenhouse gas emissions. Practical examples of international oil companies operating in Turkmenistan under the Production Sharing Agreements will be examined. In addition, NOCs will provide their latest update and action plan on reducing methane and CO2 emissions.

- Update on greenhouse gas emissions, measurement, and reporting
- Reducing methane and CO2 emissions to meet net zero and monetization
- Underground gas storage and CO2 reinjection into reservoir
- How to reduce flaring, venting and leaks
- The role of R&D in the development of oil & gas industry
