His Excellency Mr. Ali Akbar Jokar
Ambassador Extraordinary and Plenipotentiary
of the Islamic Republic of Iran to the Republic of Kazakhstan
Embassy of the Islamic Republic of Iran

Subject: Request for Support in Expanding Export Activities to the Iranian Market

Your Excellency,

Qazaq Kaolin LLP is a leading producer of high-quality kaolin in the Republic of Kazakhstan. Our core asset, the **Alekseevskoe deposit**, holds confirmed reserves exceeding **255 million tons**, making it the **largest kaolin deposit in Kazakhstan, one of the top three in the CIS**, and placing it among the **ten largest kaolin deposits in the world**.

At present, we supply kaolin to the domestic market and export to **Belarus and Russia**. Our operations are based on partnership logistics, quality assurance, and long-term client relationships.

We are currently completing construction of a **state-of-the-art mining and beneficiation complex**, which will allow us to produce **refined kaolin** with enhanced purity and advanced physical-chemical characteristics. This product is suitable for a wide range of industrial applications, including:

- Sanitary and construction ceramics
- Paper production
- Chemical industry
- Paints and coatings
- Rubber and plastic manufacturing
- Cosmetics and pharmaceuticals

As part of our international development strategy, we are strongly interested in establishing **trade relations with Iranian partners**. Kazakhstan and Iran share favorable transport connectivity via railway corridors through Turkmenistan and access to **Caspian Sea shipping routes**, which create a foundation for **reliable and cost-effective logistics**.

In this regard, we respectfully seek your support in the following areas:

- Facilitating introductions to potential Iranian buyers and industrial consumers
- Supporting our participation in relevant trade missions, exhibitions, and B2B events
- Providing guidance and assistance on matters such as customs procedures, certification, and logistics infrastructure

We believe that the complementary industrial needs of Iran and Kazakhstan offer significant potential for sustainable cooperation in the kaolin and broader industrial minerals sector.

We would be pleased to provide further information and are open to discussing any proposals or partnership opportunities.

Sincerely,
B. Kerimbay
Deputy Director
Qazaq Kaolin LLP
